Employment Summary

Applied Science Intern, (Alexa Hybrid Science) — **Amazon**
Pittsburgh, PA — *May 2019 - Aug 2019*
Oversaw a research project integrating neural end-to-end spoken language understanding for intent classification for Alexa. Experimented with developing novel semi-supervised label projection methods to generate sequential labels from full-sequence class labels. Developed architectures for "semantic endpointing," stopping the forward pass once enough information has been heard.

Research Engineer Intern — **Aural Analytics**
Scottsdale, AZ — *Dec 2018 - Apr 2019*

Integrated cloud-based ASR and developed in-house ASR models for integration in a clinical speech assessment product. Explored the design of deployable ASR systems robust to quality reduction under dysarthria.
